

BOGA SHOWRYA

Hyderabad, India | showryaboga01@gmail.com | +91 7013071987 | [LinkedIn](#) | [TryHackMe](#) | [GitHub](#)

PROFESSIONAL SUMMARY

eJPT-certified Penetration Tester ranked in the Top 1% on TryHackMe (approximately 23,000th among 6M+ registered users) with 240+ hands-on labs completed across Linux, Windows, Active Directory, Web Application Security, Networking, Privilege Escalation, and Post-Exploitation. Hands-on experience in network penetration testing, web application security testing, and Active Directory security assessments, including enumeration, Kerberoasting, AS-REP Roasting, BloodHound analysis, and privilege escalation. Proficient in Burp Suite, Nmap, Metasploit, Python, Bash, and PowerShell for security testing and automation. Experienced in producing professional penetration testing reports, technical documentation, proof-of-concept write-ups, and remediation recommendations. Actively advancing skills through PortSwigger Web Security Academy and bug bounty reconnaissance and vulnerability validation.

TECHNICAL SKILLS

Offensive Security Tools: Burp Suite, Nmap, Metasploit, Nuclei, Wireshark, Hashcat, John the Ripper, Hydra.

Active Directory: BloodHound, Kerberoasting, AS-REP Roasting, AD Enumeration, Credential Attacks, Lateral Movement, Privilege Escalation

Web Application Security: SQL Injection, XSS, IDOR, SSRF, Authentication/Authorization Vulnerabilities, Business Logic Vulnerabilities

Operating Systems & Environments: Kali Linux, Linux (Ubuntu/Debian), Windows, VirtualBox

Scripting & Automation: Python, Bash, PowerShell (security automation and tool development)

Core Domains: Penetration Testing Methodologies, Network Reconnaissance, OSINT, Vulnerability Assessment, OWASP Top 10, Manual Exploitation, MITRE ATT&CK-Aligned Reporting.

CERTIFICATIONS

- eLearnSecurity Junior Penetration Tester (eJPT) — [INE](#)
- Junior Penetration Tester Learning Path — [TryHackMe](#)
- Web Application Pentesting — [TryHackMe](#)

PROJECTS

DorkMatrix — Multi-Engine OSINT Dorking Tool | [GitHub: showrya01/DorkMatrix](#)

- Built a web-based OSINT tool enabling a single query to run across 5 search engines (Google, Bing, DuckDuckGo, Brave, Yandex) for reconnaissance.
- Supported advanced search operators (Google dorks) to strengthen information-gathering for security research.

ReconVortex — Advanced Domain Reconnaissance Engine | [GitHub: showrya01/ReconVortex](#)

- Developed an automated reconnaissance framework for bug bounty workflows to perform end-to-end attack surface discovery and intelligence gathering.
- Implements asset discovery, live host identification, subdomain enumeration, and technology fingerprinting for target mapping.
- Includes JavaScript analysis, historical URL collection, sensitive endpoint discovery, subdomain takeover detection, and risk-based prioritization.

EDUCATION

CMR Institute of Technology, Hyderabad — Graduated June 2026

B.Tech in Computer Science and Engineering (Cybersecurity) | CGPA: 7.8 / 10

ACHIEVEMENTS & GITHUB PORTFOLIO

- **Ranked in the Top 1% on TryHackMe** — approximately 23,000th globally out of 6M+ registered users.
- Completed 240+ TryHackMe rooms spanning Linux, Windows, Web Application Security, Active Directory, Privilege Escalation, Networking, and Post-Exploitation.
- **eJPT Preparation** – Hands-on documentation of network pentesting, web exploitation, Windows/Linux privilege escalation, and personal study notes.
 - GitHub: [showrya01/Ejpt_labs](#)
- **TryHackMe Reports** – Maintained a growing repository of professional penetration testing reports for TryHackMe labs, including findings and remediation.
 - GitHub: [showrya01/TRYHACKME-CHALLENGES](#)
